---

## Objective:

Computer science graduate looking to contribute their skills to a company to further improve their skills and provide the proper solutions for company goals.

## Education:

Bachelor's degree in computer science. University of Calgary (2018-2023).

- Cumulative GPA: 3.3/4.0.

## **Related Coursework:**

- Computer Science for Computer Science Majors– Worked with Java for seven years and Python for four years to develop software and small games for course related projects.
- Databases 1 and 2 – Learned how database systems operate and how data is organized and accessed through the database network. Worked with technologies such as SQL and REST API.
- Human Computer Interaction – Learned the design process of applications, and the importance of design techniques such as sketching to develop novel applications.
- Web Based Systems – Built several web application projects with JavaScript, HTML DOM, and CSS for desktop and mobile.
- Software Engineering – Cooperated with a team to develop web-based software in Java and using software engineering methods such as agile SCRUM.
- Computer Networks – Learned how the internet and networks operate with TCP, UDP and IP concepts, as well as hardware technologies such as routers and switches within networks.
- Operating Systems – Learned the importance of operating systems and how they perform their tasks.

## **Unrelated Work:**

- Part time job which involves customer service and working cooperatively with a team.

## Related Skills

- Experienced and familiar with GitHub.
- Familiar with concepts such as Object-oriented programming for software development.
- Works on personal programming projects with their free time with a team.
- Proficient in Java, HTML, CSS, SQL, Python and JavaScript. Familiar with, C#, C and C++.
- Capable of strong communication and collaboration with teams.
- Learned to develop and innovate ideas for software through sketching and design process.
- Keen on learning and developing new skills – Motivated to learn new technical techniques.
- Knowledgeable in computer hardware and enjoys custom building and assembling computers.

## Interests

- Enjoys recreational sports such as hiking, biking and ice hockey.
- Casual video editing.
