

Joshua Ngo

Computer Scientist / Information Technology Services Student

587-575-9996 joshua.ngo710@gmail.com www.joshngo.click linkedin.com/in/joshua-ngo

Profile

- Information Technology Services student at Southern Alberta Institute of Technology.
- Works frequently with Microsoft Office 365 applications such as Word and Excel.
- Shows effective communication and organizational skills for smooth workflow.
- Applies strong analytical and problem-solving skills to assigned tasks.
- Capable of working independently or in a team-based environment.
- Thorough and applies strong critical thinking skills to deliver strong results.

Education

Bachelor of Science Degree - Computer Science

September 2018 - May 2023

University of Calgary, Calgary AB (**GPA 3.3**)

- **Computer Networks:** Studied concepts including protocols, security, OSI layer functions and networking procedures to manage a network.
- **Database Management I and II:** Explored SQL, NoSQL, relation tables and data manipulation concepts and applied technology to build a school administration project.
- **Human Computer Interaction I and II:** Practiced designing user-friendly UI, applying designs to projects including a photography application in Visual Studio/C#.

Information Technology Services Student

September 2024 - Present

Southern Alberta Institute of Technology (SAIT), Calgary, AB (**Current GPA 4.0**)

- **Scripting:** Developing skills to create scripts to automate and maintain system tasks.
- **Computer Hardware:** Strengthened knowledge of computer hardware and their functions, as well as participating in the construction of computer machines during lab work.
- **Introduction to Networks:** Applied CCNA standard configurations to basic networks, troubleshooting problems and ensuring end user connectivity.
- **Routing and Switching Essentials:** Strengthening knowledge of CCNA routing and switching concepts to configure advanced network architectures.
- **Server Fundamentals:** Building proficiency to provide computer systems with services and managing system settings and policies.
- **Virtualization Fundamentals:** Developing skills to administrate systems and applications through virtualization methods and VMWare technology.

Related Skills

- Custom PC building
 - Assembled and configured multiple personal use computer systems.
